

# DUNNO SERVICES INC.

CAPABILITY STATEMENT · PRIME CONTRACTORS

## PRIME DELIVERY SUPPORT

### A flexible subcontracting partner for scoped work packages, technical augmentation, and solution-aligned hardware delivery.

Dunno Services Inc. supports prime contractors delivering public-sector and enterprise projects by contributing application development, infrastructure implementation, integration support, and coordinated hardware fulfillment under a single accountable delivery partner.

#### PRIME PARTNER SNAPSHOT

##### LOCATION

Calgary, Alberta · Remote and onsite support available

##### PROCUREMENT READINESS

PBN, SAP Ariba, and CPSS registered

##### ENGAGEMENT FIT

Subcontracting, scoped work packages, implementation support, and technical augmentation

##### PRIMARY CONTACT

Yemi George · Principal

#### PARTNER & SUPPLY ALIGNMENT

Extreme Networks Partner

Lenovo 360 Partner

Fortinet Partner

Microsoft CSP

HP / QDN

Getac

Schneider Electric

#### CORE TECHNICAL CAPABILITIES

##### Application Development & Integration

- Python, FastAPI, SQLAlchemy, and PostgreSQL-based backends
- Svelte and TypeScript administrative portals and line-of-business interfaces
- REST API development, system integration, and workflow automation
- Authentication and identity integration including JWT, OIDC, SAML, MFA, and SSO
- Survey systems, reporting portals, and multi-tenant SaaS delivery patterns

##### Infrastructure, Cloud & Productivity

- Switching, secure connectivity, and edge infrastructure deployment
- VLANs, link aggregation, STP variants, LLDP, and QoS configuration
- Firewall, routing, and small-site network implementation
- Microsoft 365 onboarding, migration, and tenant configuration
- Azure AD and identity services integration for business applications

#### HARDWARE FULFILLMENT & DEPLOYMENT SUPPORT

We support awarded projects with coordinated hardware quoting, sourcing, staging, deployment support, documentation, and handover. This allows primes to keep procurement and technical delivery aligned across client devices, network components, rugged field equipment, and supporting infrastructure.

#### WHEN TO ENGAGE US

- When a project component can be owned and delivered as a defined work package.

- When prime-led teams need added development, infrastructure, or deployment capacity.
- When hardware sourcing must stay aligned with implementation and handover.
- When solution delivery requires coordination across software, infrastructure, and identity.

## ENGAGEMENT MODELS

- Resource augmentation for development, implementation, and deployment
- Hardware procurement and delivery coordination
- Scoped work packages with defined technical ownership
- Solution-aligned staging and rollout support
- Integration, documentation, and transition support
- Prime-led delivery collaboration across multi-vendor teams

### Engage us as part of your delivery team.
